

Group 201

Volunteer Guide: KayGiles

10:30 AM - 11:00 AM registration

1. 11:00 AM - 11:40 AM hands on session

Music, Feathers, IT – Robotic Dance: The World is Your Stage room: 5.3.39
Marisa Wilson (Educational Experience)
Robots can be fun! Robotic Dance is part of RoboCup Junior – the robotic competition that can lead to international representation for your school, just like the students who have returned from Germany. Come program a robot to shake, shimmy and turn on the dance floor.

2. 11:45 AM - 12:25 PM interactive presentation

Growing Plants Using Computers room: 5.2.51
(incorporating Bioinformatics: Huh?)
Nikki Appleby (WiT and WiB)
Better crop varieties take ten years or more to discover if done in the field, but a whole generation of crops can be simulated in a computer in a very short time. Find out what simulation is and how information from the human genome project is leading to advances that will allow us to feed more people in the future.

12:30 PM - 1:00 PM lunch

3. 1:00 PM - 1:40 PM role models

Using Technology to help the Environment room: 5.2.52
Leah Pepler (Greening Australia)
Leah Pepler works for Greening Australia, a company that works to protect the environment and to educate the community about environmental issues. Leah uses special mapping technologies to assist in the protection of native flora and fauna.

Women in Games room: 5.2.52
Tanya Hempson (THQ Australia)
I will be presenting my development in IT and my move into Games. Statistics provided will include the amount of digital games companies in Australia and how many women are working professionally in games. I'll also discuss how to get into games as an Artist/IT person.

4. 1:45 PM - 2:25 PM future pathways

proudly brought to you by

thank you

presenters,
volunteers &
organisers.

Future pathways room: 5.1.26

Bev Childs (Brisbane North Institute of TAFE)
Jaya Healy (Queensland University of Technology)
Julie Edgley (Data #3)

Student will be provided with information about TAFE and University courses (and how to apply) which will assist them to arrive at a great ICT career destination.

2:30 PM - 2:45 PM closing

Closing session cafeteria
Sonja Bernhardt (Thoughtware & AWISE)

Group 202

Volunteer Guide: Alison Craddock

10:30 AM - 11:00 AM registration

1. 11:00 AM - 11:40 AM hands on session

Biomedical image analysis room: 5.3.14

Stephen Wilson (School of IT and Electrical Engineering, University of Queensland)

Biomedical engineering combines engineering, ICT and clinical medicine. People who work in this field use technology to help improve people's health and solve their health problems. In this session, you will learn about different technologies used for taking medical images. You will see several images of a heart and look at ways to detect problems associated with it.

2. 11:45 AM - 12:25 PM interactive presentation

Interactive Design room: 5.3.56

Ann Morrison (University of Queensland)

When you're finished today you'll have a base level understanding of director and its major components. You will be able to create basic director movies using tweening and simple lingo, and will leave with a director movie that encompasses all of these things

12:30 PM - 1:00 PM lunch

3. 1:00 PM - 1:40 PM role models

Women in Games room: 5.2.52

Tanya Hempson (THQ Australia)

I will be presenting my development in IT and my move into Games. Statistics provided will include the amount of digital games companies in Australia and how many women are working professionally in games. I'll also discuss how to get into games as an Artist/IT person.

Group 204

Volunteer Guide: Shyama Thambiayah

10:30 AM - 11:00 AM registration

1. 11:00 AM - 11:40 AM hands on session

Working Scientifically room: 5.3.10
 Anna Lehmann (CSIRO)
 The objective of this program is to high light the importance of conducting experiments in a controlled manner so that the results are a fair and accurate.

2. 11:45 AM - 12:25 PM interactive presentation

Virtual Reality - Real Work, Real Play room: 5.2.29
 Mike Jones (Griffith University)
 Scientists often want to look at complex objects. From the human body to the surface of the earth, the complexity that exists in nature can be daunting. This session will let you see how virtual reality can allow people to explore such objects. Wearing 3-D glasses and special gloves, you will be able to manipulate graphic models and examine the detail within.

12:30 PM - 1:00 PM lunch

3. 1:00 PM - 1:40 PM role models

IT – The Possibilities are Endless! room: 5.2.47
 Ann-Louise Blair (IBM Tivoli)
 My presentation will describe the journey I have taken to arrive in my current position as a Software Engineer at the Tivoli Gold Coast labs. I will describe my role as a Software Engineer within IBM and my favourite aspects of the job. I will discuss the IT industry in general terms & why working in the field is a challenging & rewarding experience.

I am not a Computer nerd room: 5.2.47
 Tanya Winson (Mincom)
 I chose computer studies as a subject at school because I didn't even know how to turn the computer at home on. Now I'm a Software Engineer – although I still can't touch type... You can work as an IT geek even if you're not an IT geek; it's a cool job.

4. 1:45 PM - 2:25 PM future pathways

Future pathways room: 5.1.26

Ann-Louise Blair (IBM Tivoli)

My presentation will describe the journey I have taken to arrive in my current position as a Software Engineer at the Tivoli Gold Coast labs. I will describe my role as a Software Engineer within IBM and my favourite aspects of the job. I will discuss the IT industry in general terms & why working in the field is a challenging & rewarding experience.

I am not a computer nerd room: 5.2.47

Tanya Winson (Mincom)

I chose computer studies as a subject at school because I didn't even know how to turn the computer at home on. Now I'm a Software Engineer – although I still can't touch type... You can work as an IT geek even if you're not an IT geek; it's a cool job.

Group 226

Volunteer Guide: Yudith Pardon

10:30 AM - 11:00 AM

registration

1. 11:00 AM - 11:40 AM **interactive presentation**

Girls, It's Time to Get Serious About Games room: 5.3.41

Ruth Christie (Faculty of IT, QUT)

Do you play games? Do you know how games are developed? Do you know that games development is a multi billion dollar industry? Do you want to be involved in this industry? Do you want to know how you can be involved in this or related industries? Come along and find out more!!!

2. 11:45 AM - 12:25 PM **role models**

Versatility is the Key room: 5.2.47

Debra Tapiolas (IBM)

From Dance to IT Specialist at IBM -The Journey- A Short Story. Life in IT and my work role. Computer Graphics / Database Design / Communication Strategy, Editorial, Documentation, Writing Education Materials / Process Design & Implementation / Leadership / Knowledge Management / IT Support and much more. How to enter the IT career path – Some Options & Tips

Computers and Outer Space: Choose your own adventure room: 5.2.47

Pia Waugh (Linux Australia)

I'll be showing you the variety in IT, how fun it can be, and how I've used technology to achieve my dreams. You are more technologically advanced than any generation before you, so the sky is the limit! Most of you have mobiles, computers, DVD players and more, so the step from being a technology girl to a technology career is small and fun.

12:30 PM - 1:00 PM **lunch**

3. 1:00 PM - 1:40 PM **future pathways**

Future pathways room: 5.1.26

Bev Childs (Brisbane North Institute of TAFE)

Jaya Healy (Queensland University of Technology)

Julie Edgley (Data #3)

Student will be provided with information about TAFE and University courses (and how to apply) which will assist them to arrive at a great ICT career destination.

4. 1:45 PM - 2:25 PM **hands on session**

Animation room: 5.3.22
