

# What is W!th IT gURLz?

The Department of Innovation and Information Economy through the Association of Women Educators are currently working on a project that seeks to increase the participation of girls in ICTs (Information & Communication Technologies) careers and studies across Queensland.

The lack of girls in ICTs is of concern and steps are being taken to address this imbalance, with education, information and encouragement across the state.

In the Ipswich region, the W!th IT gURLz committee has arranged an evening of information and education, with women speakers and presenters.

If you're a girl in Year 8 - 10, or the parent of a girl in those grades, we'd love to see you here at The University of Queensland, Ipswich Campus, on Tuesday, 7 October from 5pm - 8pm.

## Where

## Why

To actively engage and encourage more girls in Information and Communication Technologies studies and careers

## Who

W!th IT gURLz
